STRATEGIES FOR STRENGTHENING QUESTIONS DURING AND AFTER INSTRUCTION

PRESENTERS: ERICA SUCHMAN AND ANDREW WEST

Abstract: Questions play a central role in a dynamic classroom. Join us as we explore strategies for strengthening the development of questions used during instruction and strategies for constructing quiz and exam questions that assess what you intend for them to assess. By the end of the session, the audience will know or be able to:

• Articulate best practices regarding the alignment between objectives, instruction, and assessment.
• Differentiate between recall and application-type questions
• Delineate between using questions to drive learning versus using questions to determine learning.
• Interpret the quiz statistics generated by Canvas
• Utilize quiz statistics to construct stronger exam questions.
