The Teaching Effectiveness Framework (TEF) is a tool within the Developing and Evaluating Teaching Toolkit that provides faculty with a set of pedagogical competencies to help focus their developing teaching practice. The TEF is comprised of seven essential, interrelated domains of effective teaching practices—for face-to-face and online instruction—each grounded in the scholarship of teaching and learning. The framework toolkit includes leveled criteria within each domain, a goal-setting process, a collection of teaching practices to improve student learning, and materials for instructors and administrators to measure growth in teaching effectiveness. All professional development from TILT aligns with the domains of the framework, so that instructors can easily find experiences and resources that can help meet their teaching goals.

Principles of the Teaching Effectiveness Framework
Grounded in the Scholarship of Teaching and Learning
- The TEF provides theory and evidence-based practices that support effective teaching, and thus, student success. It includes strategies relevant to face-to-face and online instruction.
- The TEF was developed over a 36-month period with input from numerous CSU stakeholders (VP of Diversity, Committee on Teaching and Learning, Committee on Non-Tenure Track Faculty, Provost for Faculty Affairs, Deans, Chairs, Faculty, TILT Equity Advisory Group) and an in-depth literature review of effective teaching. The TEF is a living document that will be updated periodically, as research on teaching and learning develops.

Developmental and Self-reflective
- The TEF is the foundational component of the comprehensive Developing and Evaluating Teaching Toolkit. The toolkit includes a recommended process for annual review, options for goal setting, and tools for measuring teaching effectiveness. The recommended process for developing and evaluating teaching incorporates the TEF as a starting point for annual goal setting.
- The TEF is designed to be developmental and self-reflective; it is not intended to be used as a stand-alone evaluative tool but rather as a resource for goal setting and reflection within an iterative process for annual review.
- Meaningful measures of teaching must separate the impact of the instructor from the many other factors that affect the attainment of educational outcomes. Teaching is a developmental process that takes time, experience, reflection, and support; the TEF is intended to be used as a supportive and self-reflective tool to improve teaching effectiveness and student success.

Asset-based
- The TEF acknowledges that just as students bring assets to their learning, instructors have a set of assets and strengths that they bring to their teaching.
- The TEF is designed to honor variety in effective teaching. Students benefit from the cultural wealth instructors bring to their teaching; the TEF encourages instructors to find their own path to teaching effectiveness, beginning with their strengths.
- **The TEF is not intended to be used as an evaluative tool** but as a starting point for self-reflection, setting goals and building on strengths.

Collaborative
- The TEF provides a common language and definition of teaching effectiveness that facilitates discussion of best practices in teaching among CSU faculty and between faculty and students.
- Effective teaching occurs when students attain course outcomes and goals that departments and/or instructors set. The TEF provides the components proven to consistently promote student success. The complexity of developing teaching effectiveness is reflected in the depth of the seven criteria in this framework. The TEF provides the foundation for faculty both within and across disciplines to collaborate with and support each other as they support students in their learning.

Grounded in DEISJ (Diversity, Equity, Inclusion, & Social Justice)
- The TEF threads socially just and inclusive pedagogy throughout each of the domains. While Inclusive Pedagogy is identified as its own domain, fundamental inclusive practices are identified in and woven throughout each of the other domains.
- The TEF honors the challenging and dynamic nature of teaching and elevates the role of teaching faculty at an R-1 institution.
- The TEF fosters an equitable approach to feedback on teaching and supports teaching success for all faculty demographics.
### Inclusive Pedagogy

Inclusive pedagogy is a student-centered teaching approach that considers all students' backgrounds, experiences, and learning variabilities in the planning and implementation of student engagement activities, equitable access to content, mutual respect, and a more robust learning experience for all learners.

#### Inclusive Excellence Training, Reflection, and Practice
- Learning about Inclusive Excellence
- Awareness of student-identities in the classroom
- Mitigation of assumptions, biases, and microaggressions in the classroom

#### Inclusive Teaching Practices
- Use of best practices that are fundamental to Inclusive Pedagogy (see below)

#### Inclusive Excellence
- Engage in DEI trainings and reading
- Keep current on issues of racism/sexism, current racial tensions, and contemporary cultural issues in the United States
- Address bias and macroaggressions in your classroom

#### Curriculum and Curricular Alignment
- Adopt practices grounded in inclusive curriculum (see Curriculum/curricular Alignment domain in this document)
- Know the implications of religious perspectives concerning course content
- Create course materials that have been examined through the lens of CSU assistive technology resource guidelines.
- Add an inclusivity statement to your syllabus

#### Classroom Climate
- Create a welcoming and inclusive environment (see Classroom Climate domain in this document)
- Ensure inclusivity and cultural awareness in your non-verbal communication, language, and symbolic representations
- Help students learn how to communicate equitably and productively with each other
- Model productive disagreement, showing how to critique a statement or idea rather than the speaker
- Provide opportunities for students to work with others - and for students to see the value of diverse perspectives

</table>

**Inclusive Curriculum**
- Choose/Create content that deliberately reflects the diversity of contributors to the field
- Use visuals, examples, analogies, and humor that do not reinforce stereotypes but do include traditionally marginalized people or perspectives to ensure inclusivity
- Consider the needs of a wide range of learners. Visit the CSU Accessibility by Design website
- Make sure textbooks with an online component are accessible for users of assistive technology
- Vary types of assignments and assessments to appeal to learning preferences of all students
- Provide low-stakes assignments and assessments

**Learning Objectives/Outcomes**
- Use Bloom’s or Fink’s Taxonomy to write clear and measurable learning outcomes
- Write outcomes that align with the cognitive demands of the course
- Write short term outcomes for units, modules, or daily activities

**Course Alignment of Activities and Assessments**
- Use Backwards Design to align all course content, assignments, and assessments
- Align assessments, assignments, and class activities with student learning outcomes
- Align rigor of class activities, discussions, clickers questions, etc. with rigor of exams
- Design activities where students make connections between content and student learning outcomes

**Syllabus**
- Design a learner-centered syllabus
- Add an inclusivity statement to your syllabus
- Make sure your syllabus is accessible to all learners
- Provide a visual map of the course, including alignment of objectives to assessments
- Use the syllabus as a teaching and student reflection tool
- Include campus resources for students: TILT tutoring, Student Resources and Campus Life
### Classroom Climate

Classroom climate refers to the intellectual, social, emotional, and physical environment in which students learn. It is the responsibility of the instructor to intentionally create a safe space to foster a community of diverse learners.

#### Evidence

<table>
<thead>

</tr>
</thead>
<tbody>
<tr>
<td>Frequency and level of student participation</td>
</tr>
</tbody>
</table>

#### Advanced

- Institutes teaching practices that foster CSU Principles of Community and create an immediate sense of community for all learners – one that is safe, challenging, supportive and engaged.

#### Proficient

- Employs several teaching practices that foster CSU Principles of Community and create a challenging, safe, supportive, mostly engaged classroom.

#### Developing

- The instructor periodically attempts teaching practices that build and reinforce CSU Principles of Community throughout the semester.

#### Emerging

- Attempts teaching practices that build community mostly during the first week of class.

---

### Create a Welcoming and Inclusive Environment

- **Believe in all students** – that they can succeed; communicate this with them.
- **Use students’ names and pronounce them correctly** – use name tents or seating charts in large classes.
- Instructor/students create class norms and establish a system to adhere to them.
- Connect the content to the lived experiences of a variety of students.
- **Add a diversity statement** to your syllabus.
- Incorporate practices that create a sense of belonging for students in your class: international students, students of color, gender identities and disabilities.
- Incorporate Principles of Community into your class.
- Do not ask individuals to speak for an entire group of people.
- Assess the physical space of the classroom; consider the space and movement for discussions and activities.
- Ensure inclusivity and cultural awareness in your non-verbal communication, language, and symbolic representations.

### Instructor-Student Rapport

- Make time to answer student questions/create a system where all students ask questions.
- **Talk with students instead of at them**.
- Engage students in the content – through discussion, activities, and time to think.
- Ask students for feedback on your teaching several times a semester; do something with their feedback.
- Be authentic and vulnerable; tell students when you don’t know something, and find out for next class.
- Create a sense of belonging; tell students outright that they belong in your class.

### Student-Student Rapport

- Create a system for everyone to call each other by name.
- Help students learn how to communicate equitably and productively with each other.
- Encourage students to be experts; allow them to teach concepts to each other.
- Provide opportunities for students to work with others - and for students to see the value of diverse perspectives.
- Teach and model appropriate small group behaviors so everyone feels included in group work.
### Pedagogical Content Knowledge

Pedagogical content knowledge combines content knowledge and pedagogical expertise within a content area in order to employ appropriate instructional strategies that successfully address the most common misconceptions of students; the most difficult concepts for students; the most effective sequencing of concepts; important relevant connections; and the most crucial knowledge and skills students should master by the end of a course.

<table>

<tbody>
<tr>
<td><strong>Variety of motivation techniques</strong></td>
<td>The instructor uses a variety of appropriate research-based or innovative techniques to keep students motivated during every class.</td>
<td>The instructor uses several research-based or innovative motivation techniques during most classes.</td>
<td>The instructor occasionally uses motivation techniques during some classes.</td>
<td>The instructor attempts to use motivation techniques, but the successful employment of these needs further development or the instructor does little to attempt to motivate students.</td>
</tr>
<tr>
<td>Instructional language</td>
<td>The instructor consistently uses language that includes all students, encourages students, honors effort, and demonstrates belief in student abilities.</td>
<td>The instructor often uses language that includes all students, encourages students, honors effort, and demonstrates belief in student abilities.</td>
<td>The instructor occasionally uses language that encourages students or demonstrates belief in student abilities. The language might not feel inclusive to all students.</td>
<td>The instructor occasionally uses standard phrases to encourage students. (“good job,” “you can do it,” “if you read (study, pay attention...), you’ll do better on the test”)</td>
</tr>
<tr>
<td><strong>Frequency and quality of motivational/ inclusive language used during class</strong></td>
<td>Instruction includes strategic variety of activities, discussions, and connections to engage students with content. The instructor frequently models how students can best engage with content and each other. The class analyzes/discusses student-generated exemplars of assignments.</td>
<td>Instruction includes some variety of activities, discussions, and connections to engage students with content. The instructor sometimes models how students can best engage with content, each other, and provides some student-generated exemplars for high stakes assignments.</td>
<td>Instruction includes a little variety of activities, discussions, and connections to engage students with content. The instructor occasionally models how students can best engage with content, each other, and provides some exemplars for high stakes assignments.</td>
<td>Instruction includes minimal to no variety of activities, discussions, or connections to engage students with content. The instructor attempts to model how students can engage with content, each other. Exemplars are not provided.</td>
</tr>
</tbody>
</table>

### Research-based Motivation Techniques

- **Get to know students individually and personally:** backgrounds, interests, reasons for taking the course; share professional research interests and experiences.
- **Make content relevant** to all students’ lives; clearly link concepts/lessons to industry, a broader purpose, future classes/activities, or a transferable skill.
- Engage students’ emotions to see their potential to make the world a better place.
- Teach from everywhere in the room, not just from behind the podium.
- Acknowledge student effort; allow room for risk-taking and error.
- Promote growth mindset and students’ resilience by shifting attention to problem solving and working through failure.
- Choose appropriately scaled challenges for students.
- Provide opportunities to learn in a variety of learning modalities: group learning, peer learning, individual learning, learning with technology, etc.
- Guide students in analyzing/discussing student-generated exemplars of assignments
- Believe in your students’ abilities. Your perceptions are critical to their success.
- Allow students to share in groups; provide opportunities for students to teach and learn from their peers
- Welcome all students; develop a learning community among you and your students.
- Challenge students with deep learning (case studies, community-based learning, collaborative projects, etc.)
- Gauge the rigor of your instruction. Is it at a level that will provide the correct learning edge for students?
- Use low stakes assessments early in the semester to help students become familiar with what is expected, enhance learning, and provide frequent feedback on areas of confusion and misunderstanding.

### Instructional Language

- Learn and use students’ preferred names and how they pronounce them.
- Use varied names and socio-cultural contexts in stories, test questions and assignments.
- Use the appropriate language when referring to social groups.
- Use positive language when discussing challenging topics. If students struggle, remind them that they don’t know it “yet” to reinforce that you believe they will eventually reach their goal.
- When giving feedback, use language that honors attempts, promotes growth, and provides hope to students.
### Feedback and Assessment

**Frequent formative assessments and low-stakes assignments** inform instructors and students of how much, and the extent to which, content or skills are mastered. Teaching strategies can then be adjusted to meet students’ needs. Integrating a variety of assessment strategies provides all students with multiple opportunities to succeed.

<table>

<tr>
<td><strong>Alignment and Communication of Assessment Criteria</strong></td>
<td>All assessments of assignments, projects and tests are effectively sequenced, appropriate for the level of learners, and aligned with daily learning outcomes and overall course objectives. Assessment criteria are clear and communicated to students in a timely manner to be used as a learning opportunity.</td>
<td>Most assessments of assignments, projects and tests are effectively sequenced, appropriate for the level of learners, and aligned with daily learning outcomes and overall course objectives. Assessment criteria are clear and communicated to students in a timely manner.</td>
<td>Some assessments of assignments, projects and tests are purposefully sequenced, appropriate for the level of learners, and aligned with overall course objectives. Assessment criteria are mostly clear. Criteria are typically communicated to students when they receive the grade.</td>
<td>Tests, quizzes, projects, and assignments are given throughout the semester and are aligned with course objectives. Assessment criteria are unclear or unknown, or not effectively communicated with students.</td>
</tr>
<tr>
<td><strong>Formative Assessment and Low-Stakes Assignments</strong></td>
<td>The instructor regularly uses formative assessment strategies and low-stakes assignments/ quizzes to gauge student understanding, modify future lessons, make in-the-moment instructional adjustments, and give timely feedback.</td>
<td>The instructor uses several formative assessment strategies and low-stakes assignments/ quizzes to gauge student understanding, modify future lessons, make in-the-moment instructional adjustments, and give timely feedback.</td>
<td>The instructor uses one or two formative assessment strategies and low-stakes grades to give students feedback.</td>
<td>The instructor does not use formative assessment strategies or low-stakes grades to give students feedback.</td>
</tr>
<tr>
<td><strong>If applicable: Early Performance Feedback (EPF)</strong></td>
<td>The instructor opts into the CSU EPF program and provides an ample number of low-stakes assessments and feedback to students, especially during the first four weeks of class.</td>
<td>The instructor opts into the CSU EPF program and provides some low-stakes assessments and feedback to students, especially during the first four weeks of class.</td>
<td>The instructor may not opt into the CSU EPF program, but 1 or 2 low-stakes assessments provide feedback to students within the first four weeks.</td>
<td>The instructor does not opt into the CSU EPF program, and does not provide feedback to students until week five or later.</td>
</tr>
</tbody>
</table>

**Assessments**
- Convey learning objectives in student-friendly language with measurable verbs; align assessments with objectives
- Use variety in formative and summative assessments: quizzes, exams, assignments, papers, projects, simulations, presentations, etc.
- Use Classroom Assessment Techniques as formative assessments to promote mental retrieval and deep learning; this can be done in residential, hybrid, and online courses
- Use technology tools to engage students and check for understanding: (iClickers, Kahoot, Jamboard, Google)
- Use ‘on the fly’ in-class checks for understanding: Fist to five, think-pair-share, think-ink-pair-share, thumb-o-meter, etc. to inform your teaching in the moment
- Consider group quizzes or tests in addition to individual testing
- Provide structure and guidelines for student group work and group assignments

**First Four Weeks**
- Use low stakes assessments during the First Four Weeks of class
- Administer a mini-test at the same difficulty level as larger tests
- Structure time for students to engage in self/peer assessment
- Assess students’ group work skills; guide and reteach skills for productive, inclusive group work

**Assignments and Rubrics**
- Create rubrics for assignments, papers, group presentations; share rubrics with students along with assignment directions
- Align assignments and rubrics with learning outcomes
- Engage students in project ‘exemplar’ analysis before an assignment is due
- Scaffold large assignments: assign small chunks of assignments, allow for rough drafts, revisions, and peer feedback. Give students opportunities to engage in self/ peer assessment of a draft of their assignment using the rubric.
- Create real-life, authentic assessment opportunities

**Feedback**
- Give specific feedback; don’t presume that “good job” or “this needs work” will motivate
- If students will be giving feedback to each other, they will need guidelines, practice, and support
- Give timely feedback (evidence shows that long time lags between student performance and getting feedback limits the utility of the feedback)
- Make sure students know that formative assessment is a form of supportive feedback
### Instructional Strategies

The classroom, whether it be on campus or virtual, draws students from different backgrounds with various experiences and abilities. Using a variety of instructional strategies increases student engagement, critical thinking, connections to learning outcomes, and student success for all learners. Being an effective teacher requires the implementation of creative and innovative teaching strategies that work best for your course, your students, and your teaching style.
